FROM "STORE GROUPS", "LISTS", "SCHEMAS", "ITEMS" or "RULES" tabs
This is the Labels tab from the main screen (slide 2). The User can change to the "STORE GROUPS", "LISTS" and "SCHEMAS". The user can also Add, edit or remove label types and add or remove individual label references to/from a label type. The label type is associated with a store group and the displayed types and references depend on the active selection in the store groups tab. The user can also toggle label References between "open" and "closed", which determines Whether they will be able to be Ordered on the internet.

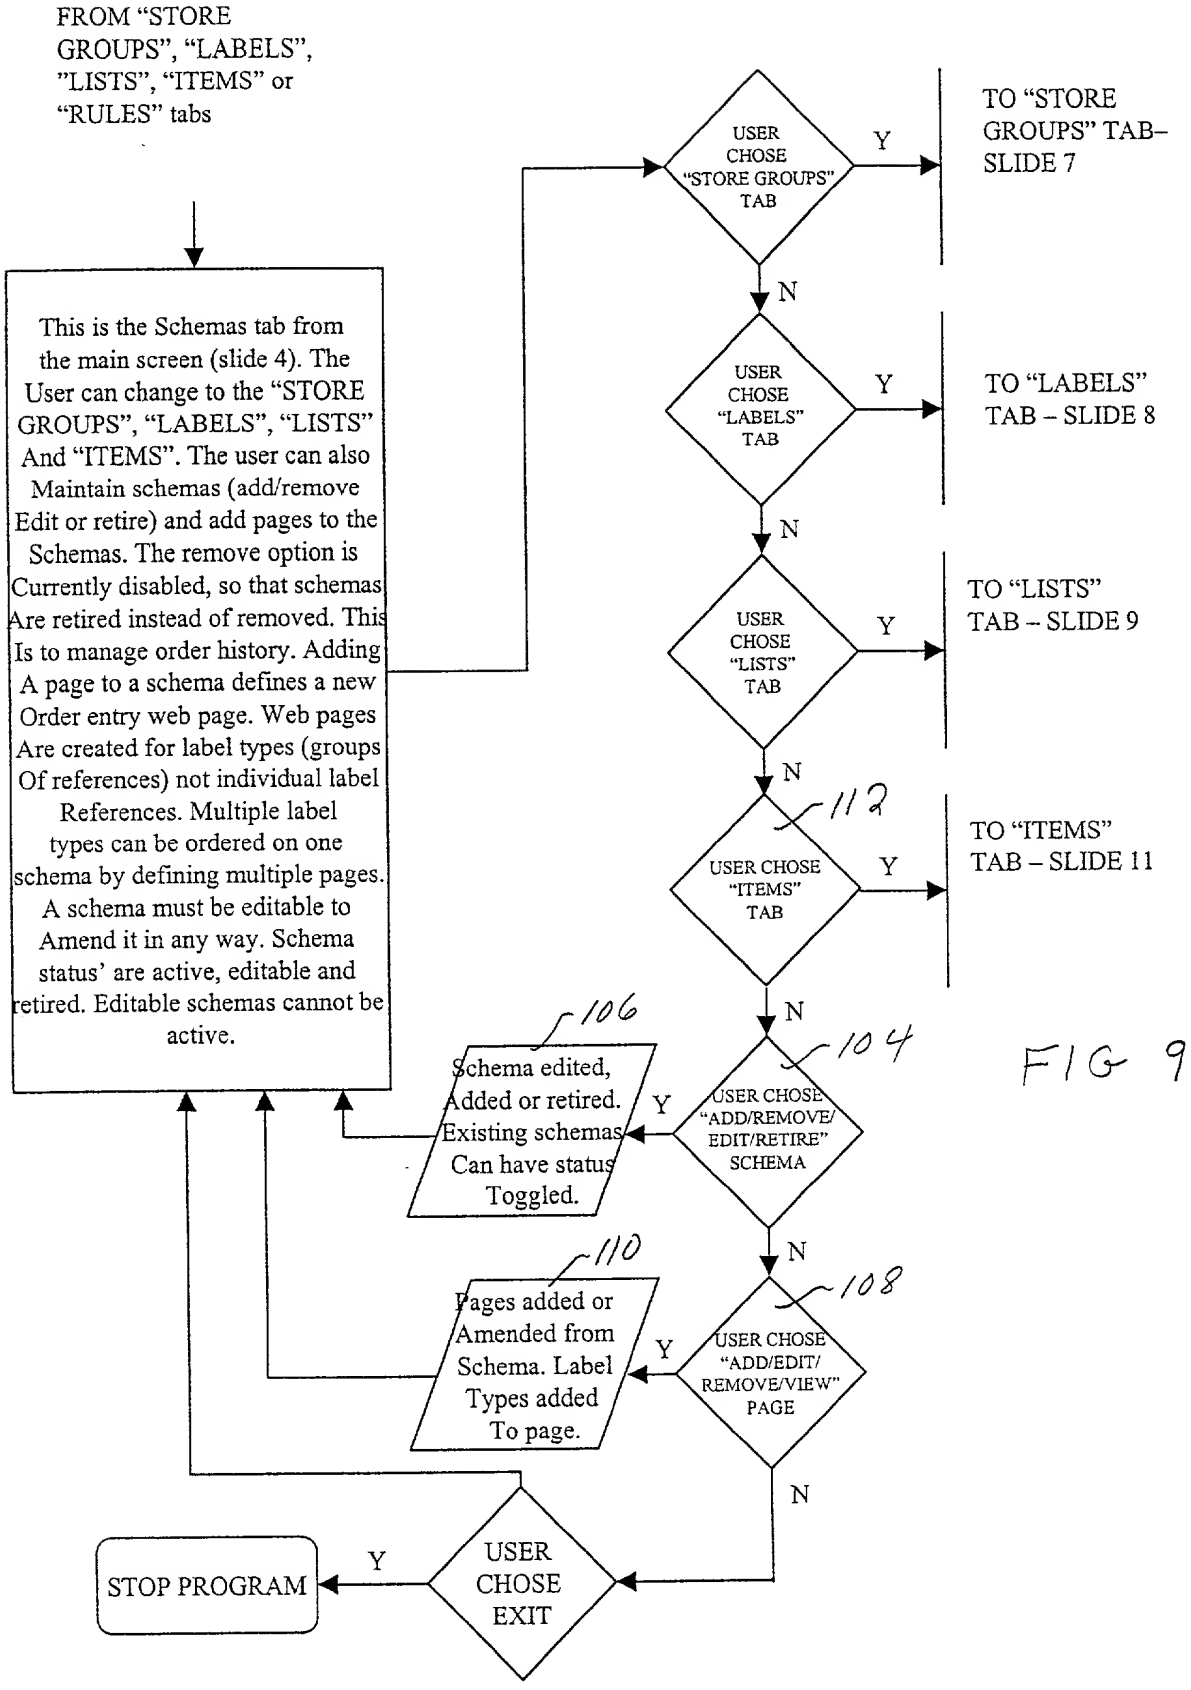
Page 3 of 3 - 3/3/2005



FROM "STORE GROUPS", "LABELS", "LISTS", "ITEMS" or "RULES" tabs
This is the Schemas tab from the main screen (slide 4). The User can change to the "STORE GROUPS", "LABELS", "LISTS" And "ITEMS". The user can also Maintain schemas (add/remove Edit or retire) and add pages to the Schemas. The remove option is Currently disabled, so that schemas Are retired instead of removed. This Is to manage order history. Adding A page to a schema defines a new Order entry web page. Web pages Are created for label types (groups Of references) not individual label References. Multiple label types can be ordered on one schema by defining multiple pages. A schema must be editable to Amend it in any way. Schema status' are active, editable and retired. Editable schemas cannot be active.
